Feels (visceral)

They feel excited and happy about learning about new meals and getting meal ideas.

Does (behavioral)

They interact with the AI Chatbot by prompting it with any preferences or needs they have.

Pre-chatbot

USER

attitude in relation to product, system, or service

Thinks (reflective)

They think about food, their appetite, and what they would like to eat. They think about their preferences and needs.

Says (communicative)

“ I would like a savory meal. I would like to not include broccoli”

“I would like a dessert option, I would like to include chocolate”

Goals: They would like to find an idea for a meal.
