TITLE_____Meal Suggestion Bot_____

Our AI Chatbot helps put together meal ideas to order or cook.	Our user is anyone who wants to get ideas for what to eat.	They find it online.
What does your AI Chatbot do?	Who is your user? What do they want?	How do they find your bot?
They prompt it with any preferences or needs.	They learn and get ideas for meals.	They say they liked using this AI, and that is useful for giving ideas.
How do they interact with the bot?	What do they learn?	What do they tell others about their experience?
